

3.5 inch Submersible Water Pump

This submersible water pump is designed for water supply from wells or reservoirs, and is suitable for domestic, civil, and industrial applications. It can be used for garden use and irrigation.

Product Overview

High-Performance Submersible Solution

This 3.5-inch submersible water pump is engineered for efficient water extraction in a variety of demanding environments. Built with high-quality, durable materials, it ensures long-lasting reliability and consistent operation. Whether utilized for agricultural irrigation, industrial water supply, or private well extraction, this pump offers a robust hydraulic design for optimal performance.

Technical Specifications

Build Quality

Durable Materials • Robust Design

Pump Diameter

3.5 inch

Suitable Applications

Well Water Extraction, Irrigation, Industrial Water Supply
