

3500 Gasoline Generator

The 3500 Gasoline Generator is a portable power solution designed for various applications. It features an engine switch, voltmeter, circuit breaker, and AC120V outlets for convenient power access.

Product Overview

Reliable Portable Power

The 3500 Gasoline Generator is a versatile, single-phase power solution engineered for reliability in demanding environments. Designed with user safety and convenience in mind, it features integrated monitoring systems and robust protective components. This portable unit is an ideal choice for emergency backup power, remote job sites, and outdoor activities requiring consistent energy access.

Technical Specifications

Power Phase	Single-phase
Fuel Type	Gasoline
AC Output	120V

Key Features

Performance Metrics

3500 W
Rated Capacity

Safety & Monitoring	Oil Sensor, Circuit Breaker, Voltmeter, Engine Switch
