

350mm Diamond Saw Blade for Marble Cutting

This diamond saw blade is designed for sharp and fast cutting of marble. It features a 350mm diameter and is engineered for efficient and clean cuts.

Product Overview

Professional Marble Cutting Performance

This 350mm diamond saw blade is engineered specifically for clean and efficient marble slab edge cutting. It delivers smooth, chip-free results with a long operational lifespan, ensuring reliability for professional masonry tasks. Designed for versatility, the blade is compatible with both hand-held cutting saws and bridge cutters, and is strictly optimized for wet cutting applications.

Technical Specifications
