

350mm Marble Cutting Saw Blade

This blade is used for cutting marble and provides high sharpness and cutting efficiency. It delivers clean cut edges in marble without material breakout.

Product Overview

Professional Marble Cutting Solution

This 350mm marble saw blade is engineered for high-precision cutting in professional stone fabrication and construction settings. It delivers high efficiency and exceptional sharpness, ensuring clean, smooth edges without material breakout. Compatible with both manual and automatic cutting machines, this durable tool is designed to meet the rigorous demands of marble processing.

Technical Specifications

Blade Dimensions

350 mm
Diameter

8 mm
Thickness

50 mm
Center Bore

Blade Configuration

- 26 Teeth (26T)
- 50mm Center Bore (Adaptable to 30mm)
- Suitable for Manual and Automatic Machines

Key Performance Indicators

High Sharpness, High Efficiency, Clean Finish, Durable Performance

Safety and Usage

Operational Safety Protocols

- Always wear ANSI-compliant eye protection
- Never operate without a proper working guard
- Inspect for cracks, breakage, or loose tips before use
- Do not use on metal
- Do not exceed maximum rated RPM
