

# 350W-600W 80 PLUS Standard Power Supply

This 80 PLUS Standard power supply is available in 350W, 400W, 450W, 500W, and 600W options. It provides stable and efficient power to system components and features a cooling fan for thermal management.

## ADDITIONAL IMAGES

## Product Overview

### Reliable Power Delivery

This ATX power supply unit is engineered to provide stable and efficient energy for desktop computers and electronic systems. With 80 PLUS Standard certification, it ensures energy efficiency during operation, helping to reduce power waste. The unit includes integrated protection circuits against over-voltage, over-current, and short-circuits, ensuring the safety and longevity of your connected components.

## Technical Specifications

Available Wattage	350W, 400W, 450W, 500W, 600W
Input Voltage	220V
Input Current	5 A
Frequency	50 Hz

## Features & Compliance

### Certifications

80 PLUS Standard

### Protection Circuits

- Over-voltage protection
- Over-current protection
- Short-circuit protection

### Cooling System

Integrated cooling fan
