

# 350W Portable Power Station with Solar Charging

This portable power station delivers 350W of power through AC, DC, and USB outputs. It can be charged via solar, home AC, or car charging methods.

## ADDITIONAL IMAGES

## Product Overview

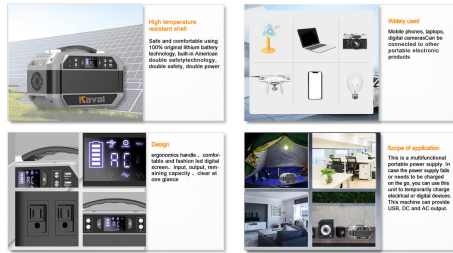

Compact and robust design suitable for outdoor use, home backup, and emergency power.

### Versatile Portable Energy Solution

This 350W portable power station is designed to provide reliable energy for a wide range of AC, DC, and USB electronic devices. Engineered for both indoor and outdoor use, it supports flexible charging through solar panels, wall outlets, or car adapters. With comprehensive safety protections including short circuit and over-temperature management, it offers a secure and efficient power backup solution for camping, travel, and emergency situations.

## Technical Specifications

### CHARACTERISTIC

Integrated LED display provides real-time information on power consumption and remaining capacity.

### Capacity

**346 Wh**

Watt-hours

**93600 mAh**

Capacity (at 3.7V)

### Weight and Dimensions

Metric	Value
Weight	4.3 kg
Dimensions	255 x 130 x 155 mm
Rated Output Power	350 W
Full Charge Time	7-8 Hours

## Connectivity

### PRODUCT DESCRIPTION

#### ENERGY STORAGE CABINET

User-friendly interface featuring clear labels for AC/DC/USB outputs and power controls.

### Available Interfaces

- 2x USB Quick Charge 3.0 (5V-9V/2A)
- 2x Type-C Quick Charge 3.0 (5V-9V/2A)
- 4x DC Output (9-12.6V 10A)
- 1x AC Output (110V/230V)

## Compliance & Safety

### Safety Protections

Short Circuit • Over Current • Over Voltage • Low Voltage • Over Temperature

### Certifications

ETL, CE, FCC, RoHS
