

# 355W Monocrystalline Solar Panel for Energy Systems

This 355W solar panel is designed for use in solar energy systems. The monocrystalline module provides excellent performance and reliability for maximum energy production.

## ADDITIONAL IMAGES

## Product Overview

### High-Efficiency Solar Solution

This 355W monocrystalline solar panel is engineered for optimal energy conversion in both residential and commercial applications. Built for resilience, it features advanced cell technology designed to perform reliably in harsh environmental conditions. The module is suitable for various energy configurations, including both grid-tied and off-grid solar power systems.

## Technical Specifications

### Rated Power Output

**355 W**

Power Output

### System Compatibility

1500V DC, 1000V DC, PID Resistant

## Performance Features

### Core Advantages

- Advanced monocrystalline cell technology
- Excellent weak light performance
- High durability for harsh environments
- PID resistance

## Applications

### Ideal Applications

Residential • Commercial • Utility-scale • Grid-tied • Off-grid
