

35mm Forstner Wood Drill Bit

This specialized woodworking drill bit is designed for creating flat-bottomed holes. It can bore precise, clean holes in wood.

Product Overview

Precision Woodworking Performance

The 35mm Forstner drill bit is a specialized tool engineered for creating clean, flat-bottomed holes in wood. Designed for accuracy, it features a sharp center point for precise positioning and a circular rim that scores wood fibers to prevent splintering. This bit is an essential component for professional cabinet making and furniture assembly, particularly for hinge recesses and dowel applications.

Technical Specifications

Cutting Mechanism

- Circular rim for scoring wood fibers
- Center point for accurate positioning
- Dual cutting edges for material removal

Hole Diameter	35 mm
Bit Type	Forstner

Applications

Common Applications	Hinge Recesses, Dowel Holes, Flat-bottomed Boring, Cabinetry
