

3.5mm Male to Dual RCA Female Stereo Splitter Cable

This 3.5mm stereo splitter cable divides a single 3.5mm stereo audio signal into two distinct outputs. It connects devices like MP3 players, smartphones, or laptops to audio systems or recording equipment with RCA inputs.

Product Overview

High-Quality Audio Signal Distribution

This 3.5mm Stereo Splitter Cable is engineered to split a single 3.5mm stereo audio signal into dual RCA outputs. It is an ideal solution for connecting mobile devices, laptops, or tablets to professional audio systems, speakers, or recording equipment. Constructed with high-quality materials, it ensures reliable signal transfer and durability for various audio distribution needs.

Technical Specifications

Connector A	3.5mm Stereo Male
Connector B	Dual RCA Female
Signal Type	Stereo Audio

Applications

Output Destinations

- Audio Systems
- External Speakers
- Recording Devices
- Surveillance Monitors

Compatible Source Devices	MP3 Players, Smartphones, Tablets, Laptops, CCTV Equipment
