

3.5mm to Dual RCA Audio Cable

This audio cable features a 3.5mm stereo jack on one end and dual RCA connectors on the other. It is designed for connecting devices with a 3.5mm audio output to equipment with RCA audio inputs, such as stereos or amplifiers.

Product Overview

High-Quality 3.5mm to Dual RCA Audio Solution

This premium audio cable is designed to bridge the gap between devices with a 3.5mm stereo output and equipment featuring RCA inputs, such as amplifiers and home theater systems. Featuring color-coded connectors for easy installation, it ensures a reliable stereo signal for professional audio-video setups. It is an ideal solution for CCTV surveillance integration and general AV connectivity.
