Product Overview

Rugged Performance for Demanding Terrains

This 3.5-ton capacity rough terrain forklift is engineered for superior performance in challenging outdoor environments. Featuring a robust four-wheel-drive system, it delivers exceptional traction and stability on uneven surfaces such as construction sites and lumber yards. The rugged design incorporates high ground clearance and a reinforced chassis, ensuring reliability and long-term durability under harsh working conditions.

Technical Specifications

Lifting Capacity

3.5 T

Rated Capacity

Drive System

4-Wheel Drive

Series Identifier

CPCY35

Features

Key Capabilities

- High ground clearance
- Adjustable forks
- High-visibility mast
- Ergonomic operator cabin

Recommended Applications

Construction Sites, Lumber Yards, Agricultural Applications
