

360-390W Solar Panel Interconnection Module

High-efficiency plate interconnection modules are designed for optimal energy conversion. These modules feature advanced cell technology to maximize power output while maintaining durability and reliability.

Product Overview

High-Efficiency Solar Module

These interconnection modules are designed for optimal energy conversion, featuring advanced cell technology to maximize power output while ensuring long-term durability. With a power range of 360W to 390W, they offer versatile performance suitable for residential, commercial, and utility-scale solar installations. Engineered for resilience, these modules provide superior performance across diverse environmental conditions.

Performance Specifications

Power Range

360 W

Minimum Power

390 W

Maximum Power

Technical Features

Key Features

- Advanced cell technology
- Durable frame construction
- High-quality materials
- Standard connectors for easy installation

Environmental Resistance

Weather Resistant • Long-term Reliability

Suitable Applications

Residential, Commercial, Utility-Scale
