Product Overview

Precision Leveling Solution

This 360-degree self-leveling cross line laser is engineered for high-precision indoor alignment and layout tasks. Featuring automatic leveling capabilities and a robust 10-meter working range, it ensures accuracy for professional tiling, cabinetry, and structural alignment. Its compact design and intuitive operation make it an essential tool for rapid and reliable site measurements.

Technical Specifications

Laser Performance Metrics

10 m Working Range	0.5 mm/m Accuracy	635 nm Wave Length
------------------------------	-----------------------------	------------------------------

Self-Leveling Capability

4 degrees Leveling Range	5 s Max Leveling Time
------------------------------------	---------------------------------

Compliance and Safety

Laser Safety Rating

Class 2 • <1mW Output

Certifications & Standards

CE-EMC, RoHS, EN60825-1

Power Requirements

Power Configuration

3V DC (2 x AA Batteries)
