

360-Degree Self-Leveling Laser Level

This auto-leveling laser projects a 360-degree horizontal laser line. It is designed for accurate leveling and alignment in construction and surveying.

Product Overview

Professional 360-Degree Self-Leveling Laser

This high-precision auto-leveling laser tool is engineered for professional construction and surveying applications. It projects a full 360-degree horizontal line, ensuring accurate alignment across entire rooms or job sites. Built for durability and ease of use, it is the ideal solution for installing drop ceilings, aligning walls, and setting foundations with confidence.
