Product Overview

Innovative 360-Degree Solar Lighting

This high-lumen, 360-degree solar LED street light offers a robust, autonomous lighting solution for outdoor spaces like squares, parking lots, and residential areas. Featuring advanced ALS and TCS technologies, it ensures reliable illumination in any weather condition while maintaining long-term battery safety. The integrated design incorporates smart features, including mobile app control and a built-in bird repeller, providing a low-maintenance and highly efficient experience.

Technical Specifications

Detailed breakdown of core features, including temperature resistance, bird repellent functionality, and lighting technology.

Operating Temperature	Down to -20°C
Autonomy Duration	10 days

Advanced Features

Core Technologies

- ALS2.1 Weather-Adaptive Lighting
- TCS Battery Safety Management
- Low-temperature heating system
- Built-in bird repeller

Connectivity

Bluetooth, iOS Compatible, Android Compatible, App Control

Design and Quality

Ingress Protection

IP65

Brightness

100% full brightness support

Lens Design

Professional lens, 0 light pollution
