

360° Green Beam Self-Leveling Cross Line Laser Level

This green beam laser level features self-leveling capabilities for accurate measurements. Its 360° horizontal coverage allows for seamless leveling in large areas.

Overview

Precision Laser Alignment

This industrial-grade green-beam laser level is engineered for high-precision leveling and alignment tasks. It features a 360° horizontal plane and a 130° vertical line, providing comprehensive coverage for professional construction and installation projects. With its self-leveling technology and manual mode for angled applications, it offers versatility and reliability in various working environments.

Technical Specifications

Laser Coverage

360 ° Horizontal Angle	130 ° Vertical Angle
----------------------------------	--------------------------------

Ingress Protection

IP54

Max Working Distance

30 m

Power & Environment

Operating Time

Mode	Time
Horizontal Only	7.5h
Vertical Only	11.5h
Horizontal & Vertical	4.5h

Power Supply

4xAA battery

Operating Temperature

-10°C to +50°C

Features

Key Features

- Green Beam Laser for superior brightness
- Self-leveling with out-of-level indicator
- Manual mode for angled lines
- Transport lock switch for secure storage
- Positioning device with strong magnets included

Included Packaging

Blow mould case
