

# 360° Rotatable TV Antenna

This 360° rotatable TV antenna is designed for optimal signal reception. It rotates via infrared remote control or manually and supports connectivity for two TV sets.

## Product Overview

### High-Performance 5-in-1 Antenna System

This comprehensive 5-in-1 antenna solution includes a booster, cable, and remote control, providing a complete kit for high-quality signal reception. Designed for versatility, it features 360-degree rotation via infrared remote or manual control to ensure optimal signal acquisition for Full HD and digital TV. Its weather-resistant construction and dual-output design make it an ideal choice for reliable multi-device home entertainment without cable subscriptions.

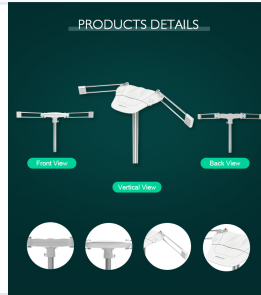

## Technical Specifications

### Rotation

**360 °**  
Rotation Range

<b>Model</b>	ET-2A
<b>Signal Support</b>	Full HD, Digital TV, VHF, UHF
<b>Output Ports</b>	2 jacks

## Design & Build

### Protection

Waterproof • UV Resistant

### Installation Type

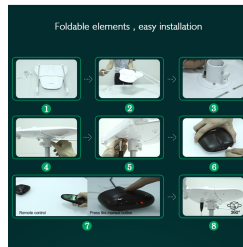

Outdoor

### Color

White

## Key Advantages

### INSTALLATION INSTRUCTIONS

### Key Features

- 5-in-1 Kit: Antenna, Booster, Cable, and Remote
- Infrared remote control for easy rotation
- Manual rotation button on power supply
- Foldable elements for easy installation
- Space-saving small package design
- Durable construction for medium-range reception

## Application

### APPLICATION SCENARIOS

### Suitable Environments

Home, Car, Marine

## Compliance & Quality

### Certifications & Standards

CE, RoHS, REACH, RED, TUV, SGS, Prop65, ISO 9001
