Overview

Professional 360° Laser Leveling Solution

This 360° self-leveling laser cross tool provides high-precision horizontal and vertical laser lines for accurate alignment and leveling tasks. Designed for versatility, it features automatic self-leveling capabilities and a wide 360° coverage, making it an essential tool for construction, installation, and surveying applications. Its robust design ensures reliable performance in demanding work environments, simplifying tasks like drop ceiling installation and wall alignment.

Max Leveling Time

Technical Specifications

Accuracy Details

Measurement Type	Accuracy
360° Level Line	±0.5mm/m
Vertical Laser Line	±0.5mm/m

Laser Properties

- Wavelength: 635nm
- Laser Class: 2
- Laser Power: <1mW

Power & Hardware

Power Source	3.7V Li battery
Mounting	1/4" Tripod screw

Features

Key Features	360° Coverage, Auto-Leveling, Green/Red LED Indicator
