

# 360W Solar Panel for Solar Energy Systems

This 360W solar panel is designed for use in solar energy systems. It utilizes advanced cell technology to ensure high power output and reliable performance in various environmental conditions.

## ADDITIONAL IMAGES

## Product Overview

### High-Efficiency Solar Power Solution

This 360W solar panel is engineered for both residential and commercial solar energy systems. It utilizes advanced cell technology to maximize power output, ensuring reliable performance even in weak light conditions. Designed for longevity, the module features a durable construction capable of withstanding harsh weather environments, making it an excellent choice for both grid-tied and off-grid configurations.

## Key Performance Metrics

### Rated Power Output

**360 W**

Rated Power

## Technical Specifications

### Mechanical Load Ratings

- 5400 Pa load capacity
- 2400 Pa load capacity

### Product Features

PID Resistant, High Efficiency, Weak Light Performance, Harsh Environment Rated

## Applications

### System Compatibility

Residential • Commercial • Grid-tied • Off-grid
