

36kV Cast Resin Current Transformer

This medium voltage current transformer is a cast-resin metering and protection device. It is designed for use in 50Hz AC power systems with rated voltage up to 36KV, and is suitable for narrow ring-net switchgear.

LZZQB15-30A

Product Overview

High-Performance Current Transformer

The LZZQB15-30A is a cast-resin current transformer designed for metering and protection in medium voltage electrical systems. Engineered for reliability in 50Hz AC power systems, it is rated for voltages up to 36kV. Its compact design makes it particularly suitable for installation in narrow, fixed ring-net switchgear configurations.

Technical Specifications

Rated Voltage	36 kV
Operating Frequency	50 Hz
Construction	Cast Resin

Application Suitability

Installation Type

Fixed • Narrow Case • Medium Voltage

Primary Applications	Metering, Protection, Ring-net Switchgear
