

3.6V 700mAh Ni-MH Rechargeable Battery

This is a rechargeable nickel-metal hydride (Ni-MH) battery with a 3.6V voltage and 700mAh capacity. It is designed for electronic devices needing a reliable rechargeable power source.

Product Overview

Reliable Power Solution

This 3.6V Nickel-Metal Hydride (Ni-MH) rechargeable battery provides a dependable power source for a variety of electronic devices. With a capacity of 700mAh, it offers consistent performance and is designed for applications requiring a compact, rechargeable power solution. Manufactured to meet standard requirements, this battery is an efficient choice for professional electronic integration.

Technical Specifications

Nominal Voltage	3.6 V
Rated Capacity	700 mAh
Chemistry	Ni-MH (Nickel-Metal Hydride)
Key Features	Rechargeable, Compact Design, Reliable Performance
Country of Origin	China
