

## 3.6V Cordless Hot Melt Glue Gun

This 3.6V cordless hot melt glue gun offers portable and convenient adhesive application. Powered by a rechargeable 3.6V battery, it provides cordless operation for enhanced maneuverability.

### Overview

#### Versatile Cordless Bonding Solution

This 3.6V cordless hot melt glue gun provides ultimate portability for crafting, DIY projects, and professional repairs without the restriction of power cables. Designed with safety in mind, it features a rubber protector and a steady plastic stand, making it suitable for a wide range of users including women and children. The ergonomic design includes a long trigger to minimize hand fatigue during extended use, while integrated color indicators provide real-time battery status updates.

### Power & Performance

#### Operating Voltage

**3.6 V**

Rated Voltage

Power Supply	Lithium-ion battery
Portability	Yes

### Design & Ergonomics

#### Key Design Features

- Long trigger for reduced working fatigue
- Rubber protector for enhanced user safety
- Folding plastic stand for steady placement
- Integrated ON/OFF switch for energy conservation
- Color-coded battery status indicators

Safety & Protection	Rubber Protector, Safety Stand, Child-Friendly Design
---------------------	---

### Technical Specs

Heating System	Rapid heating for quick readiness
Consumables	Accepts standard glue sticks

### Applications

#### Recommended Applications

Crafting • DIY Projects • General Repairs • Household Maintenance
