Product Overview

Versatile 3.6V Lithium Electric Screwdriver

This stable and reliable cordless screwdriver is designed for a wide range of applications, from daily household maintenance to light drilling tasks. It features a high-performance lithium battery system with advanced dual-chip temperature control for enhanced safety during operation and charging. With its 6-grade adjustable torque and ergonomic design, it provides professional-grade precision for both DIY enthusiasts and B2B gift set configurations.

Performance Metrics

Key Performance Indicators

3.6 V Voltage	2200 mAh Battery Capacity	3 Nm Max Torque
-------------------------	-------------------------------------	---------------------------

Technical Specifications

Torque Settings	6-grade adjustable torque
Gear Box Material	Imported powder metallurgy
Maximum Bearing Capacity	25-30kgf

Battery & Charging

Charging Port	Mini USB
Battery Cell	High-performance 18650 lithium battery

Safety Features

Safety Protections

- Over-current protection
- Motor over-temperature protection
- Motherboard over-temperature protection
- Double temperature control chips

Applications

Ideal Applications

Household Maintenance, Electronics Repair, Furniture Assembly, Light Drilling, Gift Box Sets

Design & Build

Ergonomic Features

- Textured grip for control
- Forward and reverse buttons
- Direction switch
- Compact size for tight spaces
