

3.6V Cordless Soldering Iron

This 3.6V cordless soldering iron is a portable tool ideal for soldering tasks. Its rechargeable battery allows for cordless operation, providing flexibility for electronics repair and DIY projects.

Overview

Portable Precision Soldering

This 3.6V cordless soldering iron offers professional-grade flexibility for electronics repair and DIY projects. Its wireless design eliminates cable clutter, while the integrated LED light ensures high visibility in dark or confined workspaces. The lightweight, ergonomic construction with a soft grip allows for comfortable one-handed operation during extended use.
