Product Overview

High-Efficiency LED Panel Lighting

This 36W LED flat panel light features an aviation-grade brushed aluminum frame and a sleek, modern design suitable for office, commercial, and residential ceiling applications. Engineered with optical acrylic diffuse reflection lenses and IC constant current technology, it ensures uniform light distribution and consistent performance. The unit is built for durability, utilizing high-thermal-conductivity aluminum for effective heat dissipation and a 0.3mm coated iron plate for structural integrity.

Technical Specifications

Luminous Efficacy

100 LM/W
Efficiency

Available Wattage	36W, 40W, 48W
Input Voltage	85-265V
Color Temperature Range	2700K - 6500K
Rated Lifetime	25000 H

Physical Dimensions

Construction Materials

- Aviation-grade aluminum frame
- Optical acrylic diffuse reflection lens
- PS nano-diffusion plate
- 0.3mm coated iron plate

Panel Size	595 x 595 mm
------------	--------------

Logistics

Minimum Order Quantity	1000
Packaging Standard	10 Pieces per Carton
