

3.7mm Rectangular LED for Electronics

This is a rectangular type LED. It has dimensions of 3.7mm x 3.7mm and is suitable for various electronic applications.

Product Overview

3.7mm Rectangular LED Overview

This rectangular LED component is designed for versatile use in various electronic applications. Featuring a compact 3.7mm by 3.7mm footprint, it provides a reliable lighting solution for indicator panels, consumer electronics, and circuit board assembly. Its standardized form factor ensures compatibility with a wide range of electronic designs.
