

3.7V 1155mAh Rechargeable Lithium-Ion Battery

Rechargeable lithium-ion battery with a voltage of 3.7V and a capacity of 1155mAh. This battery is designed for use with compatible electronic devices.

Product Overview

High-Performance Lithium-Ion Power

This rechargeable lithium-ion battery is engineered to provide reliable power for compatible electronic devices. With a nominal voltage of 3.7V and a capacity of 1155mAh, it offers consistent energy output for demanding applications. Designed with safety in mind, it includes clear handling guidelines and adheres to international safety standards.

Technical Specifications

Nominal Voltage	3.7 V
Capacity	1155 mAh
Battery Chemistry	Lithium-Ion
Part Number (PMN)	S005BC012
RYC Code	0563

Safety & Compliance

Safety Precautions

- Do not open, crush, or disassemble
- Do not heat above 60°C
- Follow manufacturer's charging instructions
- Risk of fire and burns if mishandled

Certifications	CE
