Product Overview

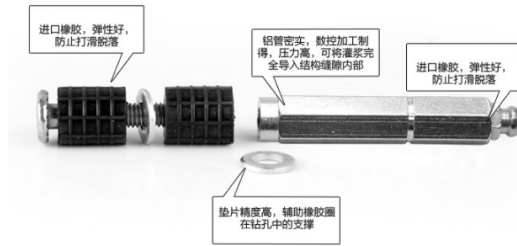

High-quality 3/8 inch injection packer designed for reliable concrete repair.

Professional Concrete Injection Packer

This 3/8 inch injection packer is engineered for high-performance concrete repair and maintenance. Constructed with premium imported rubber and high-strength aluminum, it ensures a secure, leak-proof seal during pressure grouting applications. Its precision CNC-machined design allows for reliable performance in demanding environments, making it an ideal choice for crack injection and void filling.

Technical Specifications

Precision-machined aluminum tube and high-elasticity rubber components.

Diameter	0.375 inch
Materials	Imported Rubber, Aluminum
Manufacturing	CNC Machined

Key Features

Performance Highlights

1 Yes

High Pressure Resistance

1 Yes

Anti-Slip Design

Suitable Applications

- Concrete crack injection
- Masonry repair
- Void filling
- Structural gap grouting
