

382-Degree LED Emergency Light

This high-intensity LED emergency light provides 382-degree illumination. It is designed for emergency and security applications, ensuring reliable performance during power outages and critical situations.

Product Overview

Professional Emergency Lighting

The 382-degree LED emergency light is a reliable security solution designed for critical environments. It provides high-intensity illumination that automatically activates during power failures to ensure safety and visibility. With a robust wall-mount design, it is ideal for commercial and industrial emergency applications.

Technical Specifications

Illumination Angle	382 degree
Light Source	High-intensity LED
Installation	Wall Mount

Features

Primary Features	Automatic Activation, Power Failure Ready, Durable Construction, LED Technology
