Product Overview

Advanced Germicidal Protection

The 38W Ultraviolet Germicidal Sterilizer Lamp is a high-efficiency disinfection solution designed to eliminate bacteria, viruses, and microorganisms from both surfaces and the air. This 2020 model features a compact, durable design with a protective cage, making it ideal for maintaining hygienic environments in household or light commercial settings. With dual-voltage support and a stable base, it offers a reliable and user-friendly approach to chemical-free sterilization.

Technical Performance

Power Consumption

38 W

Rated Power

Input Voltage

110V, 220V

Sterilization Method

UVC Ultraviolet Radiation

Design & Construction

Safety & Design Features

- Protective outer cage for UV tubes
- Stable support base
- Integrated indicator lights
- Silicone components for durability

Applications

Effective Against

Bacteria • Viruses • Microorganisms

Recommended Use

Household and indoor surface/air disinfection
