

3D Powder and Granule Mixer

The SXH series 3D mixer is a highly efficient machine designed for uniform blending of powders and granules. It features a unique three-dimensional motion, ensuring thorough mixing and preventing material segregation.

Overview

SXH Series 3D Mixer

The SXH series 3D mixer is a highly efficient mixing machine designed for the uniform blending of powders and granules. Featuring a unique three-dimensional motion, it ensures thorough mixing while actively preventing material segregation. Its robust stainless steel construction guarantees durability and hygiene, making it an ideal solution for demanding applications in the pharmaceutical, food, and chemical industries.

Technical Specifications

Mixing Motion

Three-dimensional motion

Material

Stainless Steel

Suitable Industries

Pharmaceutical, Food Processing, Chemical

Features

Key Operational Benefits

- Uniform blending of powders and granules
- Prevents material segregation
- High-efficiency mixing
- Hygienic stainless steel design

Control Interface

Integrated control panel for precise parameter adjustment
