

3kW Inverter Generator

This 3kW inverter generator provides a reliable power source for various applications. Its inverter technology ensures clean and stable power, making it suitable for sensitive electronics.

Overview

High-Performance 3kW Inverter Generator

This 3kW inverter generator is engineered for professional and recreational use, providing clean and stable power suitable for sensitive electronics like computers and communication equipment. Featuring advanced IGBT control modules and a robust 208CC engine, it delivers a peak output of 3200W with exceptional fuel efficiency. Its portable design, combined with whisper-quiet operation and parallel-link capability, makes it an ideal choice for emergency backup, outdoor events, and remote worksites.

Performance Metrics

Power Ratings

3200 W
Peak Power

3500 W
Running Power

9 h
Continuous Work Time

Engine & Technical Specs

Engine Displacement	208 CC
Noise Level (at 4m)	96 dBA
Control Technology	IGBT Control Modules, Auto-Voltage Controller, Inverter Technology

Key Features

Main Features

- Stable frequency, voltage, and wave output
- Whisper quiet operation for sensitive environments
- Parallel-ready: Link two units for larger power needs
- Green and environmental friendly design
- Durable frame for transportation protection

Applications

Ideal For

Computers, Communications Equipment, Sensitive Electronics, Camping, Outdoor Events, Emergency Backup

Compliance & Quality

Standards & Certifications

GS • EMC • CE • Noise EU-V

Logistics

Lead Time

35 days for container and sample orders
