

3kW Power Generator

This 3kW generator is designed for power generation applications. It features robust construction with a metallic housing and ventilation slots for cooling and is equipped with mounting points for secure installation.

Product Overview

Reliable 3kW Power Generation

This 3kW power generator is engineered for versatile power generation applications, offering a robust solution for various operational needs. It features a durable metallic housing designed with integrated ventilation slots to ensure optimal cooling during extended use. Equipped with secure mounting points, this unit is built for stable installation and consistent performance.

Performance Metrics

Rated Power

3 kW

Rated Power

Voltage & Frequency

Parameter	Value
Rated Voltage	220V / 240V
Frequency	50Hz / 60Hz

Technical Specifications

Engine Unit	178F
Brush Configuration	Brush, Brushless
