Overview

Versatile 3T Earthmoving Solution

This 3T Wheel Loader is a high-efficiency earthwork machine designed for demanding construction, mining, and agricultural projects. Its compact new design ensures convenient installation and transportation while maintaining robust performance for shoveling soil, sand, and coal. With excellent maneuverability and simple operation, it serves as a reliable asset for highway, railway, and port construction tasks.

Key Performance Metrics

Performance Highlights

1800 kg
Rated Load

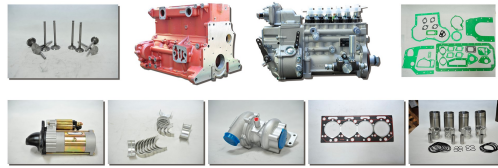

0.9 m³
Bucket Capacity

3500 mm
Dumping Height

Technical Specifications

GENUINE PARTS

Physical Parameters

Item	Value	Unit
Total Weight	5300	kg
Rated Load	1800	kg
Rated Bucket Capacity	0.9	m3
Dumping Height	3500	mm

Operational Advantages

PACKING

Key Benefits

- Fast operation and high efficiency
- Good maneuverability in tight spaces
- Simple and portable operation
- Compact design for easy transport

Applications

PROJECT

UN Project

Telecom

stone crusher

Residential building

Cement Tanker

loader

hospital-building

Bank-building

Common Applications

Highway Construction, Railway Projects, Hydropower, Port Logistics, Mining, Agriculture, Landscaping

Functional Capabilities

Material Handling

- Shoveling bulk materials (soil, sand, lime, coal)
- Excavation of ores and hard soil
- Bulldozing with auxiliary devices
- Lifting and loading/unloading wood

Compliance & Quality

Standards & Compliance

ISO 9001:2015 • CE Certified • Machinery Directive 2006/42/EC • ISO 12100:2010
