

3x8mm Tape Feeder for SMT Placement Machines

This tape feeder is designed for use in SMT placement machines. It ensures the precise and reliable feeding of 3x8mm electronic components onto PCBs.

Product Overview

High-precision tape feeder module for X series SMT placement machines.

Precision SMT Component Feeder

This tape feeder is engineered for seamless integration into high-performance automated placement systems. Designed to handle precise 3x8mm component tapes, it ensures consistent and reliable delivery during the high-speed PCB assembly process. Its robust construction supports rigorous manufacturing environments, maintaining accuracy and throughput for complex electronic component placement.

Technical Specifications

Part Number	00141099-04
Feeder Size	3x8mm

Compatibility

Compatible Machine Series	X Series, F4, F5, HS50, HS60
