

# 4-20L Plastic Bottle Blowing Machine

This high-performance bottle blowing machine is designed for producing 4-20L plastic bottles. The machine features advanced control systems for precise bottle forming and consistent quality.

## Product Overview

### High-Efficiency Bottle Blowing Solution

This high-performance bottle blowing machine is engineered for the precise production of 4-20L plastic containers. Designed for versatility, it supports various mold configurations to adapt to specific production capacity requirements. It is an ideal solution for manufacturing PET bottles for bottled water, edible oil, and other liquid applications, ensuring consistent quality and reliable operation in high-volume environments.

## Technical Specifications

### Production Capacity

**2400 bph**

Minimum Capacity

**6000 bph**

Maximum Capacity

### Applicable Bottle Volume

5-15.6 Liters

## Applications

### Suitable For

Bottled Water, Edible Oil, PET Containers
