

4-Channel 1200W Car Amplifier

This 4-channel car amplifier is engineered to deliver exceptional audio performance. Its 1200W maximum output provides substantial power for driving speakers and subwoofers.

Product Overview

High-Performance Audio Amplification

This 4-channel high-power car amplifier is engineered to deliver exceptional audio performance for demanding automotive sound systems. With a maximum output of 1200W, it provides robust power capable of driving multiple speakers or subwoofers with clarity. Designed with high-quality components, this unit ensures reliable operation and superior sound reproduction for an enhanced in-car listening experience.

Technical Specifications

Maximum Power Output

1200 W
Max Power

Channels	4
Model Identifier	TG4080

Features

Key Capabilities

- 4-Channel configuration
- High power output design
- Robust build quality
- Optimized for speaker and subwoofer arrays
