

4-Channel Vehicle Monitor System

This 4-channel monitor system is designed for trucks, buses, and other commercial vehicles. It includes a high-resolution monitor and four cameras, providing comprehensive surveillance and enhanced safety.

Overview

Comprehensive Vehicle Surveillance

The 4-Channel Vehicle Monitor System is an advanced safety solution designed for commercial vehicles such as buses, trucks, and cleaning vehicles. This comprehensive kit includes one high-resolution monitor and four cameras, providing a complete 360-degree view around the vehicle. With support for reversing priority and flexible screen display modes, it significantly enhances driver awareness and operational safety.
