

# 4-Gang LED Rocker Switch Panel with Horn Switch

This 4-gang LED rocker switch panel is designed for car and boat applications. It features four rocker switches with LED indicators and a dedicated horn switch.

## ADDITIONAL IMAGES

## Overview

### Bat-Shaped 4-Gang Control Panel

This high-end rocker switch panel features a unique bat-shaped design, combining four independent device switches with a dedicated horn button. Constructed from a durable blend of aluminum and flame-retardant ABS, it is engineered for long-lasting performance in demanding marine and automotive environments. The integrated blue LED backlighting ensures clear visibility and status indication during night-time operation.

## Technical Specifications

### Input Voltage

**12 V**

DC Low

**24 V**

DC High

### Rated Current

- 12V / 20A DC
- 24V / 10A DC

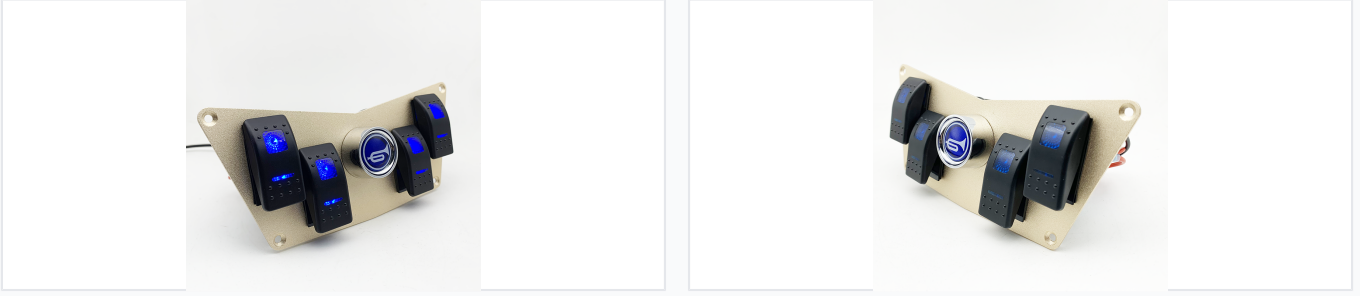

### Mechanical Life

50000 Cycles

### Operating Temperature Range

-25°C to 80°C

## Design & Materials

### Available LED Colors

Blue • Red • Green • Orange • White

### Construction Materials

Aluminium, ABS Plastic, Metal

### Panel Finish

Local Tyrant Gold

## Protection & Safety

### Integrated Protection

- Output short circuit protection
- Overload protection
- Reverse connection protection
- Flame retardant materials

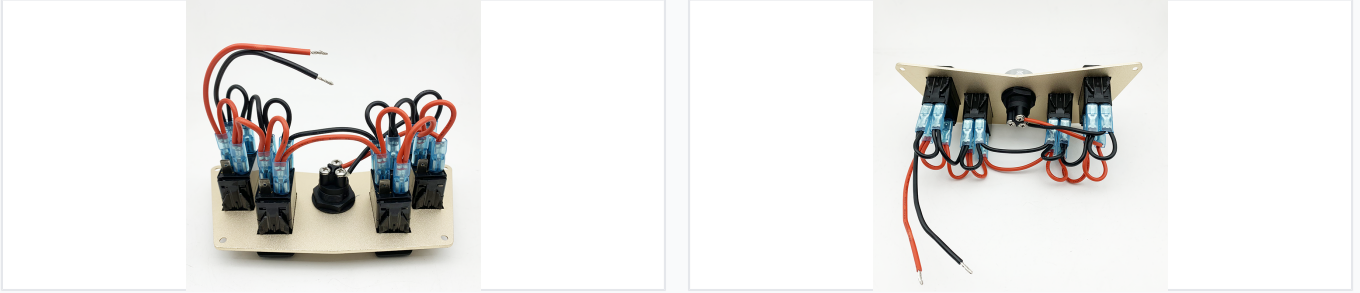

### Waterproof Grade

IP65

### Compliance

CE

## Installation & Application

### What's in the Box

- 1 x Rocker Switch Panel
- 4 x Mounting Screws
- 1 x Function Sticker Sheet

### Suitable Applications

Marine Boat, RV, Car, Truck, Yacht, Motorcycle

## Voltmeter Details

### Integrated Voltmeter

Feature	Specification
Measuring Range	5V - 30V
Display Color	Blue LED
Working Voltage	12V - 24V
