

4-High Metal Sheet Leveler

This 4-high leveler is designed for the precise leveling of metal sheets. The machine features a robust frame and a hydraulic system for adjusting roller pressure, ensuring optimal flatness.

Overview

High-Precision Metal Leveling Solution

The 4-High Metal Sheet Leveler is a robust, heavy-duty machine engineered for superior flatness and precision in metal processing. Designed to remove imperfections, it features a sophisticated 4-high leveling system that ensures high-accuracy leveling and cutting results. With an intuitive man-machine interface and streamlined maintenance, this unit is built to enhance production efficiency and perfect stacking output.

Key Features

Core Capabilities

- High accuracy leveling
- High accuracy cutting
- Perfect stacking capability
- Intuitive man-machine interface
- Simple maintenance design

Configuration

1 nos

Main Leveler Unit
