

4-Inch 48V 600W Submersible DC Water Pump

This 4-inch submersible pump system is designed for DC water pumping applications. It operates at 48V with a power rating of 600W.

Overview

High-Efficiency Solar Submersible Pump

This 4-inch submersible pump system is engineered specifically for solar-powered DC water pumping applications, offering a sustainable and efficient solution for water extraction. Operating on a 48V DC power supply with a robust 600W rating, this system includes the pump and a dedicated solar controller to manage power input and optimize performance. Designed for submersion, it is an ideal choice for various water pumping needs where reliability and energy efficiency are paramount.

Technical Specifications

IP Rating

IP68

Power Rating
