Product Overview

Professional Grade Grinding Performance

This 4-inch center depressed grinding wheel is engineered for efficient material removal and durability across a range of industrial applications. Featuring a robust aluminum oxide composition reinforced with fiberglass, it delivers reliable performance for grinding metal, steel, iron, and wood. Designed for compatibility with standard angle grinders, this wheel offers excellent self-sharpening capabilities and consistent results for demanding metalworking and construction tasks.

Technical Specifications

Dimensions

100 mm
Diameter

6 mm
Thickness

16 mm
Bore Size

| | |
|-------------------|--------------------------|
| Abrasive Material | Aluminum Oxide |
| Reinforcement | Fiberglass (2 or 3 nets) |
| Maximum Speed | 80 m/s |
| Hardness Grade | P |
| Bonding | Synthetic resin |

Usage & Compatibility

Wheel Type

Depressed Center

Suitable Materials Metal, Steel, Iron, Wood
