Overview

HIGHER PERFORMANCE

EASY AND COOL CUT.
Applied to various kinds of stainless steel and metal

Engineered for easy, cool cuts on stainless steel and various metals.

High-Performance Metal Cutting Disc

This 4-inch abrasive grinding disc is engineered for professional metalworking, offering high performance and durability for cutting all types of metal. Featuring double-net reinforced construction and high-quality aluminum oxide grains, it provides explosion-proof security and efficient material removal. Designed for easy and cool cuts, this tool is an ideal choice for grinding, blending, and finishing applications.

Technical Specifications

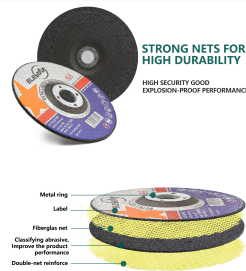

- High-quality aluminum Oxide grains.
- Excellent durability.
- For all types of materials.
- High security
- Good quality-price ratio.

High-quality aluminum oxide grains provide excellent durability.

Dimensions	100 x 3.0 x 16 mm
Maximum RPM	15200 RPM
Maximum Operating Speed	80 m/s
Abrasive Grade	A 36 Q8 BF
Application	Cutting Only, Metal, Stainless Steel

Compliance & Quality

Double-net reinforced construction ensures high durability and security.

Safety Standards

EN 12413 • ISO 9001 • MPA Certified

Key Features

- Double-net reinforced
- Explosion-proof performance
- Aluminum oxide grains
- High durability
