

4-Inch Diesel Water Pump

This diesel pump features a 4-inch inlet and outlet for high-volume water transfer. Powered by a diesel engine, it is suitable for irrigation, construction, and emergency water removal.

Overview

High-Performance 4-Inch Diesel Water Pump

This robust 4-inch diesel water pump is engineered for demanding fluid transfer applications, including irrigation, construction site dewatering, and emergency water removal. Powered by a reliable diesel engine, it combines high-volume output with excellent fuel efficiency for cost-effective operation. The unit features a durable, self-priming design housed within a sturdy protective frame, ensuring ease of use and long-lasting performance in harsh environments.

Technical Specifications

Inlet/Outlet Diameter	4 inch
Model Number	PD100(E)
Series Identifier	PD100.E3

Features

Key Features	Self-Priming, Diesel Powered, High-Volume Pumping, Heavy-Duty Frame, Portable
--------------	---

Applications

Suitable Applications

- Agricultural Irrigation
- Construction Site Dewatering
- Emergency Flood Response
- General Water Transfer
