Overview

High-Performance Cutting Precision

These 4-inch metal cutting discs are engineered to provide industry-leading performance for high-speed gas and electric-powered applications. Designed for durability and safety, they meet rigorous quality standards for professional metal fabrication. Each disc is built to handle demanding cutting tasks while maintaining consistent, reliable results.

Technical Specifications

Maximum Operating Speed

15200 RPM
RPM

80 m/s
Velocity

Dimensions	107 x 1.0 x 16 mm (4" x 1/25" x 5/8")
Abrasive Grade	A60SBF
Disc Type	T41

Compliance & Safety

Safety Instructions

- Use with safety guards and protections
- Ensure wheels are mounted correctly
- Do not exceed maximum speed
- Use in accordance with Germany MPA safety regulations

Certifications & Standards	ISO 9001, MPA Safety Regulations
