Product Overview

Professional Grade Cutting Performance

This high-performance 4-inch cutting wheel is engineered for precision cutting in stainless steel and general metalworking applications. Featuring a flat T41 design, it delivers clean, efficient cuts while maintaining durability for industrial use. The reinforced construction ensures consistent performance and reliability across a variety of demanding fabrication tasks.

Technical Specifications

Reinforced thin disc design for precision and efficiency.

HIGHER CUTTING EFFICIENCY SUPER-THIN DESIGN

Light and thin, sharp
not collapse edge
Not burning teeth

MORE THICKNESS

Super-thin design prevents edge collapse and burning during operation.

Performance Metrics

15200 RPM

Max RPM

80 m/s

Max Speed

Dimensions

- Diameter: 100mm
- Thickness: 3.0mm
- Bore: 16mm

Wheel Type

T41 Flat Wheel

Abrasive Composition

A 30 T BF

Compliance & Standards

Certifications & Standards

ISO 9001, MPA Z-04890, EN 12413

Application

APPLICATION

Applied to various kinds of stainless steel and metal

Designed for smooth operation across various stainless steel and metal applications.

Compatible Materials

Stainless Steel • Metal • Steel
