

4-inch Metal Cutting Wheel

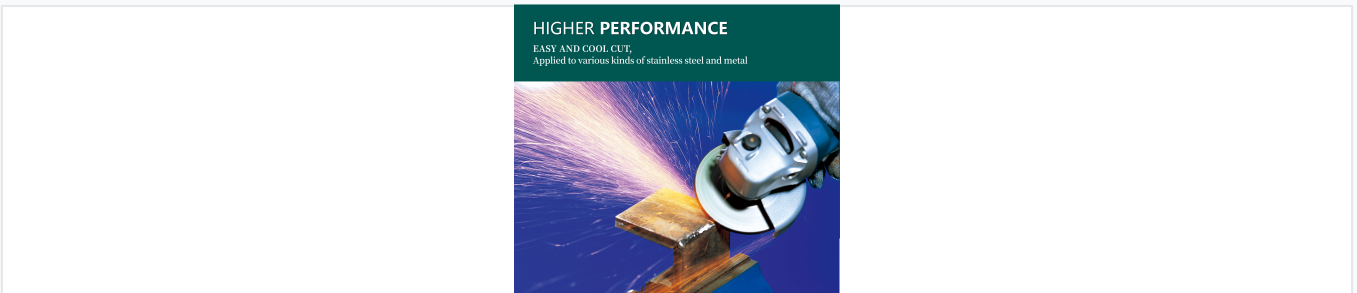

This 4-inch cutting wheel is designed for metal cutting applications. The 100mm cutting disc ensures efficient material removal and precision cutting for demanding tasks.

ADDITIONAL IMAGES

Product Overview

Engineered for easy and cool cuts on various stainless steel and metal types.

Professional Metal Cutting Solutions

This high-performance cutting wheel is engineered for efficient and precise metalworking tasks. Designed with a super-thin profile and reinforced structure, it ensures clean, cool cuts across various materials including steel and stainless steel. It is an ideal choice for industrial fabrication, maintenance, and general metal processing applications.

Technical Specifications

Super-thin design with fiberglass net reinforcement for enhanced durability and cutting efficiency.

Max Operating Speed

80 m/s

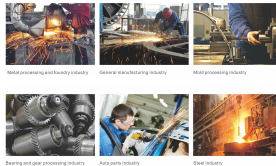

Max Speed

Dimensions	100 x 1.0 x 22.2 mm
Max R.P.M.	13300
Grit	60
Safety Standards	EN 12413, ISO 9001

Application & Usage

APPLICATION

Widely used in such industrials as machinery, automobile, ship-building, metallurgy, chemistry, iron parts decoration, equipment manufacturing of modern residence and plant building. Good sharpness and durability.

Versatile performance suitable for machinery, automotive, shipbuilding, and construction industries.

Suitable Materials

- Metal
- Steel
- Inox
- Stainless Steel

Industry Applications

Industry Sector

Machinery & Equipment

Automotive

Ship-building

Metallurgy

Construction & Plant Building
