

4-Inch Submersible Solar Water Pump for Wells

This submersible water pump is designed for well applications, featuring a 4-inch diameter. It is constructed with durable materials for reliable performance in demanding environments.

Overview

High-Efficiency Solar Water Extraction

This 4-inch submersible solar water pump is engineered for reliable performance in deep well applications. Designed with durable materials, it is suitable for residential, agricultural, and industrial water supply needs. Its submersible design ensures efficient water extraction in demanding environmental conditions.

Technical Specifications

Key Design Features

- Submersible design for deep wells
- Durable construction for harsh environments
- Solar-powered operation

Pump Diameter	4 inch
Suitable Applications	Residential, Agricultural, Industrial, Well Water Extraction
