

4-Inch Submersible Water Pump

This submersible pump is designed for water supply from wells and reservoirs. It is suitable for domestic, civil, industrial, and garden applications, as well as irrigation.

Product Overview

High-Performance Submersible Water Pump

This 4-inch submersible pump is engineered for reliable water supply from wells and reservoirs across domestic, civil, and industrial applications. It features a robust stainless steel construction, ensuring long-term durability and resistance to harsh operating environments. Designed to NEMA dimension standards, it offers consistent performance and is compatible with various power configurations to meet diverse project requirements.

Operating Conditions

Maximum Fluid Temperature	35 °C
Maximum Immersion Depth	80 m
Maximum Sand Content	0.25 %

Technical Specifications

Minimum Well Diameter	4 inches
Power Supply Options	380V-415V/50Hz (Three-phase), 220V-240V/50Hz (Single-phase)
Warranty	1 year

Materials and Components

Material Composition

Component	Material
External Casing	AISI 304 SS
Impeller	Plastic POM
Diffuser	Plastic PC
Shaft	AISI 316 / 304 SS
Bearings	NSK
