

# 4-Inch Submersible Water Pump

This submersible pump is designed for efficient water extraction from wells and boreholes. Constructed from durable stainless steel, it offers corrosion resistance and longevity in demanding environments.

## Product Overview

### High-Efficiency Submersible Water Solution

The 100QJ series 4-inch submersible pump is engineered for efficient water extraction from deep wells and boreholes. Constructed from robust stainless steel, this unit provides exceptional corrosion resistance and durability in demanding hydraulic environments. With a high-pressure multi-stage impeller system and integrated safety features like a check valve and debris strainer, it offers reliable performance for irrigation, water supply, and dewatering applications.

## Technical Specifications

Pump Diameter	4 inches
Model Series	100QJ
Material	Stainless Steel

## Key Features

### Safety Features

- Built-in check valve to prevent backflow
- Protective strainer to block large debris
- Corrosion-resistant construction
- High-pressure multi-stage impeller system

## Applications

### Suitable Applications

Irrigation • Water Supply • Dewatering
